TIDE

Test coordinators will access the Test Information Distribution Engine, or **TIDE**, to complete tasks for Ohio's State Tests, the Alternate Assessment for Students with Significant Cognitive Disabilities (AASCD) and the Ohio English Language Proficiency Assessment (OELPA) at <http://oh.tide.airast.org> or via the Ohio's State Tests Portal (www.ohiostatetests.org). Test coordinators will use TIDE to manage user accounts for online testing, enable student accessibility features and indicate test eligibility, manage rosters, submit test status requests for online testing, and more.

User Accounts and Roles

One District Test Coordinator (DTC) account will be permitted per district (or school treated as a district) for TIDE, and the DTC is responsible for managing the user accounts for other district- and building-level users. A summary of the user account roles is below. Please see the "User Roles Matrix" document, located on the Portals, for a complete list of which systems and tasks each user account can access.

Users may have more than one user role across schools and districts. For example, a teacher may be given the "Teacher" role in one school and assigned the "Test Administrator" role in another school or district. Each test coordinator should assign the role that is appropriate for their district or school. Test coordinators should carefully consider the level of access given to each user.

Each user's username will be his/her email address. Each user who needs access to one or more of Ohio's online systems should have his/her own account of the appropriate role type.

District Test Coordinator (DTC) – This person has primary responsibility for uploading student information files, ordering test materials and overseeing the administration of state assessments. The DTC is the primary point of contact between the district and ODE and much of the communication concerning Ohio's State Tests, AASCD and OELPA will be directed to the DTC. The DTC has the authority to create user accounts for all roles listed below. Note that only the DTC can create DA and DRU accounts. Any change to the DTC user must be processed through the Ohio Help Desk.

District Administrator (DA) – This optional user role allows the DTC to delegate many tasks to one or more district personnel (e.g., special education coordinator, curriculum coordinator) who will assist with the administration and oversight of the systems. The DA can create building-level user accounts, but not district-level accounts.

District Reporting User (DRU) – This user role only has access to the Online Reporting System. This user role is appropriate for district staff authorized to access reporting data, but not involved in any other aspect of the administration (e.g., superintendent).

EMIS Coordinator (EC) – This user role has the ability to upload and edit student information in TIDE, as well as download results data from the Online Reporting System. This user role is appropriate for district staff serving as the EMIS coordinator (or similar data oriented position), but not involved in any other aspect of the administration.

Building Test Coordinator (BTC) – This person is responsible for coordinating the administration of state assessments in a school building. Depending on the preference of the DTC, the BTC may also be responsible for creating and maintaining user accounts in his/her school building (BRUs, TEs, TAs and SRs).

BTCs are able to manually add students to TIDE for Ohio's State Tests, the Alternate Assessment and OELPA.

Building Reporting User (BRU) – This user role only has access to the Online Reporting System. This user role is appropriate for school staff authorized to access reporting data, but not involved in any other aspect of the administration (e.g., school principal).

Teacher (TE) – This user role is available to personnel who will administer Ohio's State Tests, AASCD and OELPA to students. For online testing, this person is responsible for setting up test sessions in the Test Administrator Interface, assisting students with signing into the Student Testing Site and proctoring the test. Additionally, this user role is also able to enter the students' scores in the Data Entry Interface (DEI) for applicable assessments. The Teacher role also has access to test progress reports for online testers in TIDE. Lastly, this user can access interactive score data for testers in the Online Reporting System.

Test Administrator (TA) – This user role is available to personnel who will administer Ohio's State Tests and OELPA to students. For online testing, this person is responsible for setting up test sessions in the Test Administrator Interface, assisting students with signing into the Student Testing Site and proctoring the test. Additionally, this user role is also able to enter the students' scores in the Data Entry Interface (DEI) for applicable assessments.

The Test Administrator role also has access to test progress reports for online testers in TIDE. However, this user does not have access to interactive score data for testers in the Online Reporting System. This role is appropriate for personnel who proctor a test but do not need access to score data.

Second Rater (SR) – This user role is for personnel who will observe an AASCD administration and independently score the student's responses and enter them in the Data Entry Interface. This person also has access to test progress reports in TIDE.

Information Technology Center (ITC) – ITC users can upload Pre-ID files only for districts with which they are associated. ITC accounts cannot be created by district personnel. Changes to the ITC account must be processed through the Ohio Help Desk.

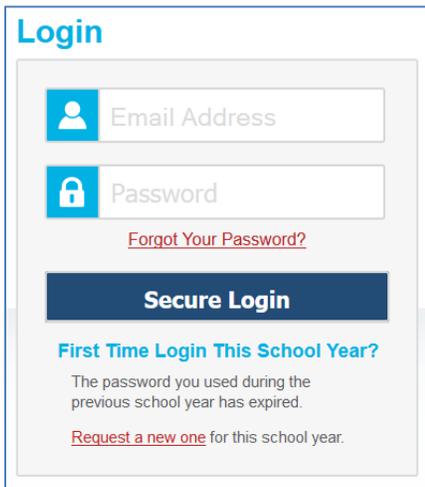

Setting Up User Accounts

User Accounts from 2015-2016

All user accounts that had access to Ohio’s online systems in 2015-2016 will continue to have access for the 2016-2017 school year. All users will be required to reset their passwords for the 2016-2017 school year.

Authorized district and school users must delete user accounts for personnel who are no longer associated with the district or school. District test coordinators are responsible for using the Users task in TIDE to ensure their district and school user accounts are accurate, or for delegating this task to a district administrator and/or to the building test coordinator(s).

Note: Users who had a Teacher-Alternate Assessment (TE-Alt) and Test Administrator-Alternate Assessment (TA-Alt) user role during the 2015-2016 school year will now have a Teacher (TE) and Test Administrator (TA) user role for the 2016-2017 school year. No additional action is required by test coordinators.

Passwords used during the 2015-2016 school year will be expired for the 2016-2017 school year. After TIDE opens on Aug. 29, all users will need to request a new password for the 2016-2017 school year. To request a new password, existing users will:

1. Navigate to the [TIDE login page](#).
2. Select the Request a new one link on the login screen.
3. Follow the steps to create a new password, which cannot be the same as any previous password.

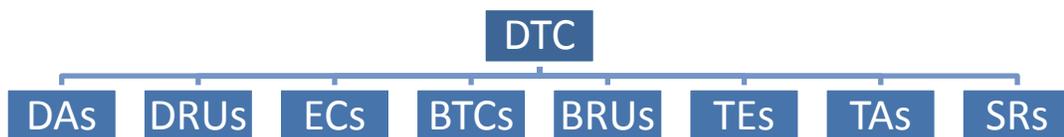

Refer to the “[Establishing Passwords for New User Accounts](#)” section of this document for more information.

New User Management Approaches

DTCs are responsible for ensuring all users who will administer Ohio’s State Tests, the AASCD or OELPA have the appropriate account. There are three basic approaches that DTCs can take to setting up user accounts. DTCs should review and determine which approach they will follow.

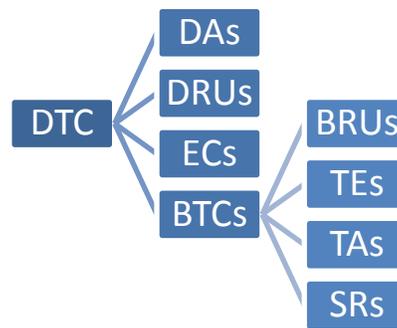

1. DTC manages all accounts

- a. The DTC may elect to manage all user accounts in the district. With this approach, the DTC determines the DAs, DRUs, ECs, BTCs, BRUs, TEs, TAs, and SRs for his/her entire district and creates an account for each user following the steps provided in the next section.
- b. The DTC manages the addition, deletion and edits of all user accounts.

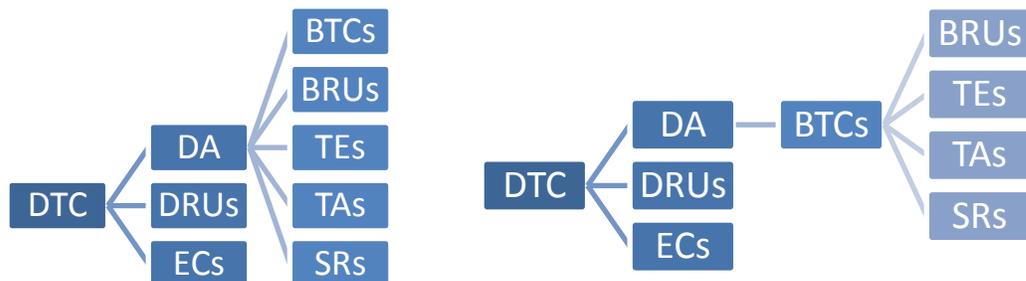

2. DTC delegates to school building personnel

- a. The DTC may elect to delegate the creation of building-level accounts to BTCs.
 - i. The DTC determines the district-level users and BTCs for his/her district and creates an account for each user following the steps provided in the next section.
 - ii. The DTC should provide guidance on setting up user accounts and the information in the next section to the BTC.
 - iii. The DTC manages the addition, deletion, and edits of all BTC and district-level user accounts.
- b. Each BTC determines the BRUs, TEs, TAs, and SRs for his/her school and creates an account for each user following the steps provided in the next section.
 - i. Each BTC manages the addition, deletion and edits of all BRU, TE, TA, and SR user accounts for his/her school.

3. DTC delegates to district personnel

- a. The DTC may elect to designate other district-level personnel as district administrators (DAs). The DTC determines the district-level users for his/her district and creates an account for each user following the steps provided in the next section.
 - i. The DTC may delegate responsibilities to one or more DAs along any lines he or she deems appropriate. The DTC may have one DA or multiple DAs. The DA can be responsible for creating all user roles, or delegating that task to BTCs.

- b. The DTC should provide guidance on setting up user accounts and the information in the next section to the DAs.
- c. The DTC manages the addition, deletion and edits of all district-level user accounts.

Working with the Users Task in TIDE

Test coordinators will be able to add new users for the 2016-2017 school year when TIDE reopens on **Aug. 29**, and will be able to make updates to user accounts throughout the school year.

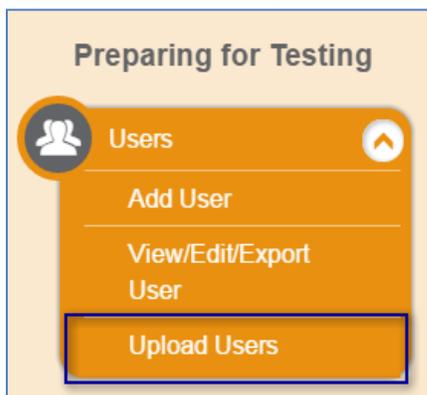

Authorized users will access the **Users** task in TIDE under the “Ohio State Tests 2016-2017” administration. The Users task allows DTCs, DAs and BTCs to add new users or modify existing users. This can be done individually or through a file upload process. To initially update TIDE with 2016-2017 users, it is recommended, but not required, that DTCs and other authorized users follow the file upload process to add, delete or edits users in the system.

Key information is listed below. Additional information on using the features of the Users task can be found in the *TIDE User Guide*.

Using the Upload Users Task to Add New Users

The Upload Users task allows authorized users to upload multiple user accounts with one data file upload. Key steps are listed below; complete information can be found in the *TIDE User Guide*.

- Use the information from the “[User Accounts and Roles](#)” section to identify who will serve each user account role.
- Log into TIDE and navigate to Upload Users.

- Prepare the data file of user information based on the Excel or CSV templates available under Upload Users. Save in either Excel or CSV format.

	A	B	C	D	E	F	G	H
1	DISTRICTID	SCHOOLID	FIRSTNAME	LASTNAME	EMAIL	PHONE	ROLE	ACTION
2								
3								
4								

Enter data in the columns as follows:

- DistrictID: Your district’s IRN (e.g., 009999). Be sure to preserve the leading zeroes.¹
- SchoolID: Your school’s IRN (e.g., 000999). Be sure to preserve the leading zeroes.
- FirstName: The first name of the user you are adding.
- LastName: The last name of the user you are adding.

¹ To preserve leading zeroes in an Excel spreadsheet, format the IRN fields as a custom number with six digits, 000000.

- Email: The email address for the user.
- Phone: Use the format xxx-xxx-xxxx. An extension can also be appended.
- Role: See [pages 2-3](#), and enter the correct acronym for each user.
- Action: Enter **ADD** in this column to create new accounts or modify existing accounts. To remove accounts, enter **DELETE** in the Action column.
- *Note: Do not change or move the column headers in the first row.*

□ Upload users following the steps listed in TIDE.

1. Browse to find the file, and choose “Next”

2. Preview the file to ensure you have selected the correct file.

Verify you uploaded the correct file. Click **Next**. If the values in the columns are incorrect, try re-creating your upload file using one of the available templates from the previous [Upload Users](#) page.

Step 2: Preview

Enter search terms to filter search result

Row Number	District IRN	School IRN	First name	Last name	Email	Role	Phone number	Action
1	000002	000003	DTC	user	DTCuser12345008@air.org	BTC	999-222-0303	ADD
2	000002	000003	BTC	user	BTCuser12345008@air.org	BTC	999-222-0303	ADD
3	000002	000003	DA	user	DAuser12345008@air.org	DA	999-222-0303	ADD
4	000002	000003	TE	user	TEuser12345008@air.org	TE	999-222-0303	ADD

3. Validate the file to ensure there are no errors in the file.

Step 3: Validate

Legend:

-  Error: The file can be uploaded, but this row will not be included.
-  Warning: This field is invalid, but the row will be uploaded.

4. After reaching Confirmation of the upload process, new accounts will be created for all valid new user records. Each new user will receive an email from the Ohio Help Desk on behalf of TIDE. This email contains a temporary password that the user must click on to establish his/her password. Ohio’s online systems cannot be accessed until the new user establishes his/her password.

Users who already have an account will not receive an email from the Ohio Help Desk if their user role changes or they are associated to additional buildings. They can continue to use the password established at the beginning of the 2016-2017 school year.

Upload Users

1. Upload 2. Preview 3. Validate 4. Confirmation

Step 4: Confirmation

Results: 4 records are committed.

Upload New File

Other Options for Managing Users

Authorized users may elect to add and edit user accounts one at a time. A summary of these options is listed below; complete information can be found in the *TIDE User Guide*.

Preparing for Testing

Users

- Add User
- View/Edit/Export User
- Upload Users

1. **Add User** -- This feature allows DTCs, DAs or BTCs to create new user accounts individually. To enter an account, select the user’s role and enter his/her first and last name, phone number and email address. Click “Add User.” The user will receive an email from TIDE. This email contains a secure link that the user must click on to establish his/her password.

Add User

Establishing Passwords for New User Accounts

When a new user account is created, an activation email is sent to the user. The email contains a temporary password and instructions on setting up the user's account. Users must activate their account within **30 days** of receiving the original message to establish a password. The account does not become active until a password is established.

The user will follow these steps to activate the account:

1. Go to the [TIDE login page](#) and enter their username (i.e., the email address to which the activation email was sent) and temporary password from the activation email. Click Secure Login.
2. The Reset Password page will appear. In the *Old Password* field, enter the temporary password in the activation email.
3. In the *New Password* and *Confirm Password* fields, enter your new password. The new password must be at least 8 characters long and have at least **three** of the following:
 - one lowercase alphabetic character
 - one uppercase alphabetic character
 - one number
 - one of the following special characters: %, #, or !
4. Create a security question and answer to be used if the user forgets their password or wants to reset it.

The screenshot shows a login interface with the following elements:

- Login** header in blue.
- Input field for **Email Address** with a person icon.
- Input field for **Password** with a lock icon.
- [Forgot Your Password?](#) link in red.
- Secure Login** button in a dark blue box.
- First Time Login This School Year?** section in blue.
- Text: "The password you used during the previous school year has expired."
- [Request a new one](#) link in red for this school year.

If a user fails to establish their password within the 30-day period, he/she may request to have a new temporary password sent by doing the following.

1. Go to the [TIDE login page](#).
2. Click the "Click here to request one" link.
3. The Password Reset page will appear. Enter in your email address and select the Next button. Doing so will resend an email with a new temporary password. You can then use the temporary password to establish your new password.
4. Users who have previously established a password may be asked to answer a security question. Once the security question has been correctly answered, an email will be sent with a temporary password. When you login with the temporary password, you will be prompted to create a new password. The new password cannot be the same as any previous password.

Please note that passwords will automatically expire 350 days after the password is established.
