Introduction to the User Guide

This user guide supports Test Administrators (TAs) who manage testing for students participating in the Ohio’s State Tests (OST), Alternate Assessment for Students with Significant Cognitive Disabilities (AASCD), Ohio English Language Proficiency Assessment (OELPA), Ohio English Language Proficiency Screener (OELPS) and Ohio Graduation Tests (OGT) practice tests and operational tests.

Organization of the User Guide

The guide includes the following sections:

- How TAs Proctor Test Sessions in the TA Site
- How Students Sign in to the Student Testing Site and Complete Tests

There is also an appendix with additional information and instructions.

Understanding the Test Delivery System’s Sites

- The Test Delivery System delivers Ohio’s online tests and consists of practice sites and operational testing sites. The practice sites function identically to the operational testing sites. However, the tests that are available in the practice and operational sites are different. Tests administered in the TA Practice Site are for practice to familiarize the student with the system, may be administered any time and may be taken multiple times. The TA Interface is for operational test administrations.

  Practice Sites
  - TA Practice Site: Allows TAs to practice administering tests.
  - Student Practice Site: Allows students to practice taking tests online and using test tools. Students can log in to the testing site with their name and ID or as guests. Students can either take proctored tests in sessions created by TAs in the TA Practice Site or they can take non-proctored tests by logging in as a guest.

  Operational Testing Sites
  - TA Interface: Allows TAs to administer operational tests.
  - Student Testing Site: Allows students to take operational tests.

Throughout the rest of this user guide, “TA Site” refers to both the TA Interface and TA Practice Site.
How TAs Proctor Test Sessions in the TA Site

Administering online tests in TDS is a straight-forward process and the basic workflow is as follows:

1. The TA selects tests and starts a test session in the TA Site.
2. Students sign in to the Student Testing Site and request approval for tests.
3. The TA reviews students’ requests and approves them for testing.
4. Students complete and submit their tests.
5. The TA stops the test session and logs out.

This section describes the following tasks that TAs must perform to successfully administer online tests:

- Selecting Tests and Starting a Test Session
- Approving Students for Testing
- Managing a Test Session

For information about the testing process from a student’s perspective, see the section How Students Sign in to the Student Testing Site and Complete Tests.

Selecting Tests and Starting a Test Session

The first step in administering online tests is to select the tests that you wish to administer and start a test session. You can select tests and start a test session from the Test Selection window that opens automatically when you log in to the TA Site.

Only the tests that you select will be available to students who join your session. You may have only one session open at a time. You cannot reopen closed sessions, but students can resume a test in a new session.

How to Create a New Test Session

1. If the Test Selection window is not open, click Select Tests in the upper-right corner of the TA Site (otherwise skip to step 2).
2. To select tests for the session, do one of the following:
   – To select individual tests, mark the checkbox for each test you want to include.
   – To select all the tests in a test group, mark the checkbox for that group.

Please note, the **Test Selection** window color-codes tests and groups them into various categories. A test group may include one or more sub-groups. All test groups and sub-groups appear collapsed by default and you may have to expand the test group to view individual tests.

   – To expand a test group, click [Expand All]. To collapse an expanded test group, click [Collapse All].

3. In the lower-left corner of the window, click **Start Session** (the exact label for this button may vary depending on whether you are starting a practice or operational session).

4. The Session ID appears on the TA Site. Provide the Session ID to your students. Please remember to write down the Session ID in case you accidentally close the browser window and need to return to the active test session.
How to Add Tests to an Active Test Session

If necessary, you can add additional tests to an ongoing test session.

While you can add tests to an active test session, you cannot remove tests from an active test session.

1. In the upper-right corner of the TA Site, click Select Tests.
2. In the Test Selection window (see Figure 2), mark the checkbox for the required test and click Add to Session in the lower-left corner. The exact label for this button may vary depending on whether you are starting a practice or operational session.
3. In the confirmation message that appears, click Yes.

Approving Students for Testing

After students sign in to the Student Testing Site and select tests, you must verify that their settings and accommodations are correct before approving them for testing.

When students are awaiting approval, the Approvals button next to the Session ID becomes active and shows you how many students are awaiting approval. The Approvals notification updates regularly, but you can also click in the upper-right corner to update it manually.

How to Approve Students for Testing

1. Click Approvals. The Approvals and Student Test Settings window appears, displaying a list of students grouped by test.
2. To check a student’s test settings and accommodations, click for that student. The student’s information appears in the Test Settings window. This window groups test settings by their classification. Icons next to each setting indicate whether it is a universal tool ( ), designated support ( ), or accommodation ( ).
a. If any settings are incorrect, update them as required. Students should not begin testing until their settings are correct.

   ■ Editable settings must be updated in this window, while read-only settings must be updated in TIDE.

b. Do one of the following:

   ■ To confirm the settings, click Set. You must still approve the student for testing (see step 5).

   ■ To confirm the settings and approve the student, click Set & Approve.

   ■ To return to the Approvals and Student Test Settings window without confirming settings, click Cancel.

3. Repeat step 2 for each student in the Approvals and Student Test Settings list. Since the Approvals and Student Test Settings window does not automatically refresh, click Refresh at the top of the window to update the list of students awaiting approval.

4. If you need to deny a student access to testing, do the following (otherwise skip to step 5):

   a. Click ✗ for that student.

   b. Optional: In the window that appears, enter a brief reason for denying the student.

   c. Click Deny. The student receives a message explaining the reason for the denial and is logged out. The student can still request access to the test again.

5. If you wish to approve students directly from the Approvals and Student Test Settings window, do the following:

   o To approve individual students, click ✔ for each student.

   o To approve all students for a given test, click Approve All Students for that test.
Managing a Test Session

After you approve students for testing, you can monitor the testing progress for each student logged in to your session, approve a student’s print request, and pause a student’s test if necessary.

How to Monitor Students’ Test Progress

You can monitor the testing progress for each student logged in to your session from the table(s) displayed on the TA Site.

At the start of the test, all your students will be listed in the Tests started/paused/completed table. If TDS detects that a student requires assistance, such as a student’s test has been paused due to an environment security breach or due to the launching of a forbidden application, the Tests requiring TA intervention table appears at the top for that student; a more info icon is displayed in this column for the student. When you hover over the icon, a message is displayed providing details about the issue. The top table lists the students who need intervention and the bottom table lists the other students in your session.

The table(s) refresh at regular intervals, but you can also refresh it manually by clicking in the upper-right corner of the TA Site. You can also sort the tables by a given column by clicking the column header.

Table 1 describes the columns in the tables for monitoring students’ test progress.

Table 1. Columns in the Table(s) for Monitoring Students’ Test Progress

<table>
<thead>
<tr>
<th>Column</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Student Information</td>
<td>The name and SSID of the student in the session.</td>
</tr>
<tr>
<td>Opp #</td>
<td>Opportunity number for the student’s selected test.</td>
</tr>
<tr>
<td>Test</td>
<td>Name of the test the student selected.</td>
</tr>
<tr>
<td>Time</td>
<td>Indicates the approximate elapsed time (in minutes only) in the student’s test. There will be an approximate one minute delay between the elapsed time showing on the student’s test and the time displayed in this column.</td>
</tr>
</tbody>
</table>
How TAs Proctor Test Sessions in the TA Site

<table>
<thead>
<tr>
<th>Column</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Progress</td>
<td>Indicates the student’s test progress. It displays a progress bar to indicate the percentage of questions the student has answered out of the total number of questions.</td>
</tr>
<tr>
<td>Test Status</td>
<td>Current status for each student in the session. For more information about the statuses in this column, see Table 2. If a student has paused their test or if TDS detects that a student may be experiencing technical difficulties or requires assistance, a more info icon (more info•) is displayed in this column for the student. When you hover over the icon, a message is displayed providing details about the issue.</td>
</tr>
</tbody>
</table>
| Test Settings| This column displays one of the following:  
  - **Standard**: Default test settings are applied for this test opportunity.  
  - **Custom**: One or more of the student’s test settings or accommodations differ from the default settings.  

To view the student’s settings for the current test opportunity, click .|
| Actions | Allows you to perform any available actions for an individual student's test. The Pause button in this column pauses the student’s test. A test that has been paused by the TA will not display a more info icon (more info•). |

Table 2 describes the codes in the Test Status column of the table(s) for monitoring students’ test progress.

<table>
<thead>
<tr>
<th>Column</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Approved</td>
<td>You approved the student, but the student did not yet start or resume the test.</td>
</tr>
<tr>
<td>Started</td>
<td>Student started the test and is actively testing.</td>
</tr>
<tr>
<td>Review</td>
<td>Student visited all questions and is currently reviewing answers before submitting the test.</td>
</tr>
<tr>
<td>Completed</td>
<td>Student submitted the test. The student can take no additional action at this point.</td>
</tr>
<tr>
<td>Submitted</td>
<td>Test was submitted for quality assurance review and validation.</td>
</tr>
<tr>
<td>Reported</td>
<td>Test passed quality assurance and is undergoing further processing.</td>
</tr>
<tr>
<td>Paused*</td>
<td>Student’s test is paused. The time listed indicates how long the test has been paused.</td>
</tr>
<tr>
<td>Pending*</td>
<td>Student is awaiting approval for a new test opportunity.</td>
</tr>
<tr>
<td>Expired*</td>
<td>Test was not completed by the end of the testing window and the opportunity expired.</td>
</tr>
<tr>
<td>Suspended*</td>
<td>Student is awaiting approval to resume a test opportunity.</td>
</tr>
</tbody>
</table>

*Appears when the student is not actively testing. The student’s row grays out in such cases.
**How to Pause a Student’s Test**

You can pause a student’s test if necessary.

1. In the Actions column of the table(s) for monitoring students’ test progress, click for the student whose test you wish to pause.

2. Click Yes to confirm. The Test Delivery System logs the student out.

**How to Stop a Test Session**

When students finish testing, or the current testing timeslot is over, you should stop the test session. Stopping a session automatically logs out all the students in the session and pauses their tests.

Once you stop a test session, you cannot resume it. To resume testing students, you must start a new session. Please note, the Test Delivery System automatically logs you out after 20 minutes of both user and student inactivity in the session. This action automatically stops the test session.

- In the upper-right corner of the TA Site, click , then click OK in the confirmation message that appears. The test session stops.

**How to Log Out of the TA Site**

You should log out of the TA Site only after stopping a test session. Please note that navigating away from the TA Site also logs you out. If you need to access another application while administering tests, open it in a separate browser window to prevent stopping a test session that is in progress.

If you log out from another Ohio Assessment system, such as TIDE, you will also log out of the TA Site.

1. In the banner, click . A warning message appears.

2. In the warning message, click Log Out. The Ohio Assessment Portal appears.
How Students Sign in to the Student Testing Site and Complete Tests

This section describes the student sign-in process for the Student Testing Site that students follow when starting a new test or resuming a paused test. It also describes how students can view stimuli, respond to questions, pause a test, review previously answered questions, and submit a test.

How Students Sign in and Select Tests

When testing, students must sign in to the appropriate testing site. For sessions created in the TA Interface, students sign in to the Student Testing Site on the Secure Browser or Take a Test app.

Students may also take practice tests in the Student Practice Site to familiarize themselves with the online testing process. Aside from the sign-in process, the Student Practice Site has the same appearance and functionality as the Student Testing Site. For information on how students sign in to the Student Practice Site, please see the Appendix.

How to Sign in to the Secure Browser or Take a Test App

1. Launch the Secure Browser or Take a Test app on the student’s testing device. The Student Sign-In page appears.

2. Next, students enter the following information:

   a. In the First Name and Student ID fields, students enter their first name and SSID as they appear in TIDE.

   b. In the Session ID field, students enter the Session ID as it appears on the TA Site. The first part of the three-part session ID that indicates whether a student is on the Student Testing Site or the Student Practice Site is pre-filled.

3. Optional: Students can modify test settings (such as background and text color) for the sign-in process, which persist until you set the actual test settings during the TA approval process:

   a. Students select the cog wheel in the upper-right corner of the Student Sign-In page to open the Settings page.

   b. Next, they select their preferred options from the available drop-down lists and select OK.
4. Students select Sign In. The Is This You? page appears.

**How to Verify Student Information**

After signing in to the Student Testing Site, students must verify their personal information on the Is This You? page.

- If all the information on the Is This You? page is correct, the student selects Yes to proceed.
- If any of the information is incorrect, the student must select No.

You must notify the building or district test coordinator that the student’s information is incorrect. Incorrect student demographic information must be updated before the student begins testing.

**How to Select a Test**

Students can select their tests from the Your Tests page that appears after students verify their personal information. The Your Tests page displays all the tests that a student is eligible to take. Students can only select tests that are included in the session and still need to be completed.

1. From the **Your Tests Page** that lists a student’s eligible tests in color-coded categories, the student selects the name of the test.
   - If a student’s required test is inactive or not displayed, the student should log out. You should verify the test session includes the correct tests and add additional tests, if necessary.

2. The student’s request is sent to the TA Interface for approval and the student is taken to the **Waiting for Approval** page. After you approve the student for testing, the student can proceed to the next step:
How to Check Student Device Functionality

Depending on the test content and the specified test settings, students may need to verify that their testing device is functioning properly from the Audio/Video Checks page. If a test does not require functionality checks, this page is skipped.

1. From the Audio/Video Checks page that displays each required functionality check in its own panel, the student verifies each functionality as explained below.

2. Once all functionality checks have been verified, the student selects Continue to proceed to the Instructions and Help page.

How to Check Text-To-Speech Functionality

The Text-to-Speech Sound Check panel appears if a student has the text-to-speech (TTS) setting. Students can only use TTS within the Secure Browser, a supported Chrome or Firefox browser, or the Take a Test app.

If TTS does not work, students should log out. You can work with students to adjust their audio or headset settings or move them to another device.

- From the Text-to-Speech Sound Check panel, students select \[ \text{I heard the voice} \] and listen to the audio.
  
  - If the voice is clearly audible, students select I heard the voice. A green check appears at the upper-right corner of the panel and students can proceed to the next functionality check.
  
  - If the voice is not clearly audible, students adjust the settings using the sliders and select \[ \text{I heard the voice} \] to listen to the audio again.
If students still cannot hear the voice clearly, they select I did not hear the voice to open the Audio Check panel.

- Students can select Try Again to return to the Text-to-Speech Sound Check panel and retry.

- Students can select Continue to skip verifying the text-to-speech functionality. Students can also do this from the Text-to-Speech Sound Check panel by selecting Skip TTS Check.

How to Check Audio Playback Functionality

The Audio Playback Check panel appears for tests with listening questions and allows students to verify that they can hear the sample audio.

If the audio does not work, students should log out. You should troubleshoot the device and headphones or move the student to another device with working audio.

- From the Audio Playback Check panel, students select and listen to the audio.
  - If the sound is clearly audible, students select I heard the sound. A green check appears at the upper-right corner of the panel and students can proceed to the next functionality check.

  - If the sound is not clearly audible, students select I did not hear the sound to open the Sound Check: Audio Problem panel.
    - Students can select Try Again to return to the Audio Playback Check panel and retry.

How to Check Recording Device Functionality

The Recording Device Check panel appears for tests with questions that require students to record audio responses. On this panel, students record their voice and verify that they can hear the recorded audio.

If the recording device does not work, students should log out. You should troubleshoot the recording device or set up a new recording device.
Test Delivery System User Guide

1. From the **Recording Device Check** panel, students select 🎤 to begin recording their voice.

2. Students speak into their recording device, and then select 🔴 to stop recording.

3. Next, students select 🎧 to listen to their recorded audio:
   - If the recorded audio is clearly audible, students select **I heard my recording**. A green check appears at the upper-right corner of the panel and students can proceed to the next functionality check.
   - If the recorded audio is not clearly audible, they select **I did not hear my recording** to open the **Problem Recording Audio** panel.
     - Students can select **Try Again** to return to the **Recording Device Check** panel and retry.
     - Students can select **Select New Recording Device** (which only appears for students testing on computers or tablets with multiple recording devices) to open the **Recording Input Device Selection** panel and select a different recording device.

### How to View Instructions and Begin Testing

The **Instructions and Help** page is the last step of the sign-in process. Students may review this page to understand how to navigate the test and use test tools. Students may also review their test settings from this page.

1. **Optional**: To view the help guide, students select **View Help Guide**. To close the window, students select **Back**.

2. **Optional**: To review their test settings, students select **View Test Settings**. To close the window, students select **OK**.

3. **Optional**: Review any additional test information, as applicable.

4. To start the test, students select **Begin Test Now**.
How Students Navigate the Student Testing Site

A test page can include the following sections:

- The **Global Menu** section displays the global navigation and tool buttons. It also includes the **Items** menu, test information, help button, pause button, system settings button, and timer.

- The **Stimulus** section, which appears only for questions associated with a stimulus, contains the stimulus content, context menu, and either the expand passage button or reading mode button.

- The **Question** section contains one or more test questions (also known as “items”). Each question includes a number, context menu, stem, and response area.

The following sections provide details about how to navigate the Student Testing Site.
How to Navigate between Items

- Some test pages may have only one question and others may have more or may consist of multiple parts that students must answer.
  - After students respond to all the questions on a page, they select Next in the upper-left corner to proceed to the next page.
  - To navigate to a previous question in a test, students select Back.

- When multiple items are grouped with a stimulus, the items are tabbed for individual viewing. Students select the tabs in the upper-right corner to proceed to the corresponding question.

- To jump directly to an item, select an item number from the pop-up window that appears when you select the Items menu.
  - If an item has been marked for review, 🔄 is displayed next to the item.
  - If an item has been skipped or not answered, ▲ is displayed next to the item.

How to View Stimuli

When a test question is associated with a stimulus, students should review that stimulus before responding to the question. A stimulus is a reading passage or other testing material (such as a simulation or graphic) that students review in order to answer associated questions.

- Reading Passages: When the stimulus is a reading passage, the content is paginated if this feature is turned on for the student.
  - To move between the pages of a reading passage, students can select 📖 and 📖 below the stimulus.
  - Students can also select 📖 to open the Reading Mode window, which displays two pages at a time.
How to Respond to Test Questions

The items presented in TDS are of various types and students may need to respond to them differently. Students can use the Student Practice Site to familiarize themselves with the question types that may appear on tests.

All responses are saved automatically. Students can also manually save their responses to questions by selecting Save in the upper-left corner.

Test questions may require students to do any of the following tasks:

- Select one or more choices from a list of answer options.
- Use an on-screen keypad to generate an answer.
- Select graphic objects or text excerpts.
- Place points, lines, or bars on a graph.
- Drag and drop text or graphic objects.
- Enter text in a text box or table.
- Match answer options together.
- Modify a highlighted word or phrase in a reading selection.
- Enter input parameters to run an on-screen simulation.
- Expand categories and select options within them.

How to Pause Tests

Students can pause the test at any time. Pausing a test logs the student out. To resume testing, students must repeat the sign-in process.

- To pause a test, students select Pause in the global menu and then select Yes in the confirmation message that appears.

If students are testing on Chromebooks, please ensure that they pause the test before closing the lid of the Chromebook. If the lid is closed before the test pauses, whoever opens the Chromebook next will be able to see the last question that the student was viewing (and any response they entered).

How Students Use Test Tools

A number of testing tools are available for students in TDS. Some tools are available for all tests, while others are only available for a particular subject, accommodation, or type of question. There are primarily two types of test tools available:
How Students Sign in to the Student Testing Site and Complete Tests

- Global Tools: These tools appear in the global menu at the top of the test page and are available for all items in a test.
- Context Menu Tools: These tools are specific to the passage or question being viewed.

Students can access tools using a mouse or keyboard commands. For information about keyboard commands, please see the appendix.

How to Use Global Tools

The global menu consists of navigation buttons on the left and tool buttons on the right. Table 3 lists the tools available in the global menu.

Figure 27. Global Menu

Table 3. Global Tools

<table>
<thead>
<tr>
<th>Tool Name</th>
<th>Instructions</th>
</tr>
</thead>
</table>
| Calculator | To use the on-screen calculator, select **Calculator** in the global menu.  
The graphing calculator is available on the following tests:  
  - Algebra I  
  - Geometry  
  - Integrated Mathematics I  
  - Integrated Mathematics II  
The scientific calculator is available on the following tests:  
  - Grade 6 Mathematics part 2  
  - Grade 7 Mathematics part 2  
  - Grade 8 Mathematics parts 1 and 2  
  - Ohio Graduation Tests Mathematics  
  - Ohio Graduation Tests Science |
| Formula | To view the on-screen formula sheet, select **Formula** in the global menu.  
Available on the following tests (sheet specifics vary by test):  
  - Grades 4 to 8 Mathematics  
  - Algebra I  
  - Geometry  
  - Integrated Mathematics I |
### How to Use the Language Toggle Tool

The Language Toggle tool allows students to switch between the two languages in which test content is available. When switching languages, the test content and all the elements on the screen, such as button labels and dialogs, switch to the selected language. Students can view the content in the chosen language.
Some important things to keep in mind when using the Language Toggle tool are:

- To be able to use the Language Toggle tool the default language must be set to Spanish. This is only available on OST Mathematics, Science and Social Studies tests.
- By default, items are presented in the default language specified in the test settings. If a student toggles the language for an item and then proceeds to the next item, the next item will be displayed in the default language. If the student returns to the previous item, the previous item will continue to be displayed in the language to which the student had toggled until the student switches the language again.
- If a student highlights or masks text in one language and then switches to a different language, the corresponding sections will not be highlighted or masked. If the student switches back to the first language, the original highlighting or masking will be displayed provided the student has not highlighted or masked sections in the alternate language.

**How to Use the Masking Tool**

The Masking tool allows students to hide distracting areas of the test page.

- To mask an area of a test page:
  a. Select **Masking** in the global menu. The button becomes orange.
  b. Click and drag across the distracting area of the test page. The selected area becomes dark gray. The tool remains active until you deactivate it.

- To deactivate the masking tool, select **Masking** in the global menu again. The button becomes green. Please note that masked areas will remain on the screen until you remove them.

- To remove a masked area from a test page, select X in the upper-right corner of a masked area.
How to Use Context Menu Tools

A test page may include several elements, such as the question, answer options, and stimulus. The context menu for each element contains tools that are applicable to that element (see Figure 29 and Figure 30). Table 4 lists the available context menu tools.

If a question has multiple parts, a context menu may be available for each part of the question. In such cases, the active context menu (i.e., the context menu for the item or stimulus currently in focus) appears enabled while the other context menus look grayed out.

Furthermore, the item number and context menu of the item a student is attempting remains visible on the screen even when scrolling through the item’s content to allow easy access to an item’s context menu.

**Table 4. Context Menu Tools**

<table>
<thead>
<tr>
<th>Tool Name</th>
<th>Instructions</th>
</tr>
</thead>
<tbody>
<tr>
<td>Highlighter</td>
<td>To highlight text, select the text on the screen and then select <strong>Highlight Selection</strong> from the context menu. To remove highlighting, select <strong>Reset Highlighting</strong> from the context menu.</td>
</tr>
</tbody>
</table>
**Tool Name** | **Instructions**
---|---
**Mark for Review** | To mark a question for review, select **Mark for Review** from the context menu. The question number displays a flap in the upper-right corner and a flag icon appears next to the question number on the test page. The **Items** pop-up window also displays a flag icon next to the question number.

**Select Previous Version** | To view and restore responses previously entered for a Text Response question, select the **Select Previous Version** option from the context menu. A list of saved responses appears. Select the appropriate response and click **Select**. Note: Prior responses will not be available if the test has been paused, or if the student has clicked End Test.

**Strikethrough** | For selected-response questions, you can cross out an answer option to focus on the options you think might be correct. There are two options for using this tool:
- **Option A:**
  - a. To activate Strikethrough mode, open the context menu and select **Strikethrough**.
  - b. Select each answer option you wish to strike out.
  - c. To deactivate Strikethrough mode, press **Esc** or click outside the question's response area.
- **Option B:** Right-click an answer option and select **Strikethrough**.

**Text-to-Speech** | To listen to passages and questions, select a **Speak** option from the context menu.

**Text-to-Speech Tracking** | When this tool is enabled, words become highlighted as TTS reads them aloud.

**Tutorial** | To view a short video demonstrating how to respond to a particular question type, select **Tutorial** from the context menu.

**How to Use the Select Previous Version Tool**

The Select Previous Version tool allows students to view and restore responses they previously entered for a text response question. For example, if students type a response, click **Save**, delete the text, and enter new text, they can use this tool to recover the original response. Please note that if the student’s...
test pauses, or if the student reaches the review screen, any responses entered prior to pausing or reviewing will no longer appear in the Select Previous Version window.

1. To recover a previously-entered response, select the Select Previous Version option from the context menu. The Select Previous Version window appears, listing all the saved responses for the question in the left panel.

2. Select a response version from the left panel. The text associated with that response appears in the right panel.

3. Click Select. The selected response appears in the text box for the question.

How to Use the Text-To-Speech Tool

Students testing with TTS can listen to passages, questions, and answer options using the TTS options available in the selected element’s context menu. If a student is using Text-to-Speech Tracking, the words become highlighted as they are read aloud. TTS is only available when using the Secure Browser or a supported Chrome or Firefox browser.

- To listen to a passage, students open the passage context menu and select a Speak option. Students can also select a portion of text to listen to, such as a word or phrase. To do this, students select the text, open the passage context menu, and select Speak Selection.
  - Please note that when listening to passages, students can pause TTS and then resume it at the point where it was paused. While this functionality is available on Windows, Mac, and iOS, it is not available on Android and Chrome OS. Students testing on a Chrome OS can resume a paused TTS passage by selecting the remaining text to be read aloud and selecting Speak Selection from the context menu.

- To listen to a question or answer options, students open the question context menu and select one of the following Speak options:
  - To listen to the question, students select Speak Question. On multiple choice and multi-select questions, students will also hear all answer options.
How Students Sign in to the Student Testing Site and Complete Tests

To listen only to an answer option, select **Speak Option** from the context menu and then select the answer option. Students could also right-click the answer option and select **Speak Option**.

- AASCD tests display ear icons 🎧 by questions and answer options. Students can click these icons to listen to the corresponding test content.

### How to Use Other Tools

In addition to the global tools and context menu tools, there are some additional tools that may be available to students based on their accommodations or the test page layout. Table 5 lists the additional tools available in the Student Testing Site.

#### Table 5. Other Tools

<table>
<thead>
<tr>
<th>Tool Name</th>
<th>Instructions</th>
</tr>
</thead>
<tbody>
<tr>
<td>Expand Passage</td>
<td>To expand the passage section, select the double arrow 📖 icon. The section will expand and overlap the question section for easier readability. To collapse the expanded section, select the double arrow 📖 icon again.</td>
</tr>
<tr>
<td>Reading Mode</td>
<td>Reading Mode opens a pop-up window that lets you view two pages of a reading passage at a time. To open Reading Mode, select 📖 below a reading passage. To exit Reading Mode, select 📖 in the lower-right corner of the pop-up window.</td>
</tr>
</tbody>
</table>

### How Students Complete a Test

After students have completed their test, they need to submit their test.

#### How to Submit a Test

To complete the testing process, students must submit their tests when they are done answering questions.

Please note that once students submit their tests, they cannot return to the test or modify answers.
1. Students select **End Test** in the upper-left corner, which appears after students respond to the last test question. A confirmation message appears.

2. Students select **Yes**. The **End Test** page appears, allowing students to review answers and submit the test for scoring.
   - A flag ( располагающийся ) icon appears for any questions marked for review. A warning ( располагающийся ) icon appears for any unanswered questions.

3. **Optional**: To review previous answers, students select a question number. When done reviewing, they can return to the **End Test** page by selecting **End Test** again.

4. To submit the tests, students select **Submit Test**, then select **Yes** in the confirmation message that appears. The **Your Results** page appears displaying the student’s name, the test name, and the completion date.

5. To exit the Student Testing Site, students select **Log Out**, and then close the Secure Browser.
Appendix

A

Alternate Assessments in the Student Testing Site

You can administer alternate assessments online by adding the tests to sessions in the TA Site following the same procedure used to add any other test to a session. However, the appearance and behavior of the Student Testing Site is slightly different for alternate assessments.

Navigating Alternate Assessments

The Student Testing Site displays alternate assessments in full-screen mode with the global menu hidden by default.

1. To proceed to the next question, students select Next.

Note: All items are required for the alternate assessments. Students cannot proceed to the next question until a response option or the Mark as No Response option has been selected.

2. To exit full-screen mode and access the global menu, students select in the upper-left corner. A message appears, asking for a password.
   - Students enter their first name and click OK. The global menu appears at the top of the screen.
   - When signed in as a guest user in the Student Practice Site, students enter Guest.

3. To return to full-screen mode, students select Full Screen in the global menu.

Listening to Audio Content

The test pages display ear icons, which read aloud the content for passages, questions, and answer options. If a student requests the administrator re-read any of the content, the administrator must first allow the text-to-speech to play to account for any “hidden text” before repeating any of the text-to-speech audio for the student.

To listen to the test’s content, students must do the following:
To listen to a passage, select beside the passage.

To listen to a question and its answer options, select beside the question.

To listen only to an answer option, select below the answer option.

To stop the audio, click while it is playing.

– You cannot pause audio content. If you select again, it will play the audio from the beginning.

Responding to Questions and Ending a Test

Alternate assessment questions display answer options as cards, which may include text, graphics, or both. All items are required for the alternate assessments. Students cannot proceed to the next question until a response option or the Mark as No Response option has been selected.

To select an answer option, students select a card. Once a card is selected, arrows appear at the top and bottom of the card along with a blue border.

To indicate that no response was provided for an item and proceed with the test, do the following:

a. From the item’s context menu, select Mark as No Response, then select Yes in the confirmation message that appears.
   - The item’s response options are disabled and a no response icon is displayed on top of the item. For reporting purposes, the item is assigned a condition code of NR.

b. Optional: To revert, from the item’s context menu, select Unmark No Response. However, if you had entered any response prior to marking the item as “No Response”, that response will not be retrieved.

To end a test, exit full-screen mode and select End Test. You can submit the alternate assessment by following the same procedure used to submit all other assessments in the Student Testing Site.

K

Keyboard Commands in the Student Testing Site

Students can use keyboard commands to navigate between test elements, features, and tools. Some important things to note about keyboard commands are:
Test Delivery System User Guide

- Keyboard commands require the use of the primary keyboard, so please do not use keys in a numeric keypad.
- Some keyboard commands (such as the commands for using the Line Reader) may not work when testing on iOS or Android devices connected to an external keyboard.
- When Permissive Mode is enabled for a test, keyboard commands are blocked and will not work.

**Keyboard Commands for Sign-In Pages and In-Test Pop-ups**

Table 6 lists keyboard commands for selecting options on the sign-in pages or pop-up windows that appear during a test.

<table>
<thead>
<tr>
<th>Function</th>
<th>Keyboard Commands</th>
</tr>
</thead>
<tbody>
<tr>
<td>Move to the next option</td>
<td>• Tab</td>
</tr>
<tr>
<td>Move to the previous option</td>
<td>• Shift + Tab</td>

<td>• Ctrl + Right Arrow</td>
</tr>
<tr>
<td>Go to the previous test page</td>
<td>• Ctrl + Left Arrow</td>
</tr>
<tr>
<td>Open the global menu</td>
<td>• Ctrl + G</td>
</tr>
<tr>
<td>Open a context menu</td>
<td>• Ctrl + M</td>
</tr>
</tbody>
</table>
Keyboard Commands for Global and Context Menus

Students can use keyboard commands to access tools in the global and context menus. For more information about tools in these menus, see the How Students Use Test Tools section.

Global Menu
1. To access the global menu tools using keyboard commands, press Ctrl + G. The global menu list opens.
2. To move between options in the global menu, use the Up or Down arrow key.
3. To select an option, press Enter.
4. To close the global menu without selecting an option, press Esc.

Context Menus
1. To open the context menu for an element (question, answer options, or stimulus), navigate to the element using the Tab or Shift + Tab command.
3. To move between options in the context menu, use the Up or Down arrow keys.
4. To select an option, press Enter.
5. To close the context menu without selecting an option, press Esc.

Keyboard Commands for Highlighting Selected Regions of Text

This section explains how to use keyboard commands to select a text excerpt (such as a word in a passage) and highlight it. These instructions only apply to students using the Secure Browser.

1. To select text and highlight it, navigate to the element containing the text you want to select.
2. Press Ctrl + M to open the context menu and navigate to Enable Text Selection.
3. Press Enter. A flashing cursor appears at the upper-left corner of the active element.
4. To move the cursor to the beginning of the text you want to select, use the arrow keys.
5. Press Shift and an arrow key to select your text. The text you select appears shaded.

Keyboard Commands for Grid Questions

Questions with the grid response area may have up to three main sections— an answer space, which is the grid area where students enter the response; an object bank, which is a panel containing objects you can move to the answer space; and a button row, which appears above the answer space and may include Delete, Add Point, Add Arrow, Add Line, Add Circle, Add Dashed Line, and Connect Line buttons.
Test Delivery System User Guide

- To move between the main sections, do the following:
  - To move clockwise, press Tab. To move counter-clockwise, press Shift + Tab.

- To add an object to the answer space, do the following:
  a. With the object bank active, use the arrow keys to move between objects. The active object has a blue background.
  b. To add the active object to the answer space, press Space.

- To use the action buttons, do the following:
  c. With the button row active, use the left and right arrow keys to move between the buttons. The active button is white.
  d. To select a button, press Enter, and then press Space to apply the point, arrow, or line to the answer space.

- To move objects and graph elements in the answer space, do the following:
  e. With the answer space active, press Enter to move between the objects, and then press Space. The active object displays a blue border.
  f. Press an arrow key to move the object. To move the object in smaller increments, hold Shift while pressing an arrow key.

Keyboard Commands for Equation Questions

Equation questions allow students to use keyboard commands to open a menu listing the special characters they can insert into the response area.

1. To insert special characters in the response area, with the focus in the text field of the response area, press Alt + 7. The Special Characters window opens.

2. To move between options in the context menu, use the Up or Down arrow keys.

3. To add the selected option to the response area, press Enter.
Login Information for the TA Site

To be able to access the TA Sites, your test coordinator must first create your account in TIDE. Once your account is created, you receive an account activation email. You can log in to the TA Sites after activating your account.

2. Select your user role.
3. Select the appropriate TA Site:
   a. To access the TA Interface, click **TA Interface**.
   b. To access the TA Practice Site, click **TA Practice Site**.
4. The **Login** page appears. Enter your email address and password.
5. Click **Secure Login**. The selected TA Site appears.
   a. If you have not logged in using this browser before, or if you have cleared your browser cache, the **Enter Code** page appears and an email containing an authentication code is sent to your address.
      - In the **Enter Emailed Code** field, enter the emailed code.
      - Click **Submit** to view the TA Site.

**Note:** You must use the authentication code within 15 minutes of the email being sent. If the code has expired, click **Resend Code** to request a new code.
Pause and Test Timeout Rules

Pause Rules
Test administrators and students can pause a test in order to temporarily log the student out of the test session. Students cannot access their test if it is paused for more than one day, even if they marked questions for review. The exceptions to this rule are:

- The district test coordinator submits a test status request for reopen in TIDE
- The student is taking an AASCD test. Paused tests can be re-accessed at any time during the test window
- The student is taking the OELPS test. Paused tests can be re-accessed within three days

These pause rules apply regardless of whether the student or the TA pauses the test or a technical issue logs the student out.

Test Timeout Rules
A warning message displays after 20 minutes of test inactivity. Students who do not click OK within 30 seconds after this message appears are logged out. This timeout automatically pauses the test.

Practice Test Site Student Sign-in Process
The Student Practice Site allows students to take practice tests. Aside from the sign-in process, the Practice Test Site has the same appearance and functionality as the Student Testing Site.

Students can take practice tests in proctored sessions created in the TA Practice Site or in non-proctored/guest sessions. Students also have the option to sign in to the test sessions with their real identities to take tests specific to their grades or sign in as guests to take tests for any grade-level.

1. To access the Student Practice Site, do one of the following:
   - From the Ohio Assessment Portal (http://ohiostatetests.org), select the Practice Test card.
   - In the Secure Browser, select the Take a Practice Test button.

2. To sign in, students do the following:
   - To sign in as a guest, students set the Guest User toggle to On. Otherwise, to use their real credentials, students set the Guest User toggle to Off and then enter their first name and SSID.
To join a guest session, students set the Guest Session toggle to **On**. Or else, to join a proctored session, students set the Guest Session toggle to **Off** and enter the Session ID from the TA Practice Site.

Students select **Sign In**.

- If signed in with their real identities, the **Is This You** page appears. Students verify their information and click **Yes** to proceed to the **Your Tests** page.

- If signed in as guest users, students are directly taken to the **Your Tests** page.

3. On the **Your Tests** page, students do one of the following:

   - If signed in with their real identities, students select a test from the ones available for their grade.

   - Students signed in as guests select their grade level from the drop-down list to view the tests available for that grade and then select a test.

4. If the students signed in to a guest session, they must select the test settings they wish to use from the **Choose Settings** page and then select the **Select** button. When selecting the color of the text and background, mouse-pointer, and print size settings, students can see a live preview of their selected settings.

5. If the test includes audio content or text-to-speech settings, the **Audio/Video Checks** page appears displaying the functionality checks that need to be performed. Students must follow the instructions on this page to ensure their device is working properly.
6. On the final sign-in page, students may review the help guide, their test settings, and the additional test information, then select **Begin Test Now** to start or resume their test opportunity.

**Practice Test Score Report**

After students submit the test, the **Your Results** page appears. For OST Practice Tests (not including Item Release Tests), this page also displays the test score. Table 8 provides an overview of the columns in the score report.

<table>
<thead>
<tr>
<th>Column</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Question Number</td>
<td>The link in this column opens the question page with the student’s entered response.</td>
</tr>
<tr>
<td>Your Answer</td>
<td>For multiple-choice questions, this column displays the student’s selected answer option. For technology-enhanced questions, this column displays ✔️ if the student’s response was correct, or ✗ if the student’s response was incorrect.</td>
</tr>
<tr>
<td>Correct Answer</td>
<td>For multiple-choice questions, this column displays the correct answer option. For technology-enhanced questions, this column displays the scoring criteria.</td>
</tr>
<tr>
<td>Score</td>
<td>Number of points the student earned out of the maximum points possible for the question.</td>
</tr>
</tbody>
</table>

**Print Session Information**

You can print a snapshot of the TA Site as it currently appears if you wish to keep a hard-copy record of the Session ID or list of approved students. Please note that Federal law prohibits the release of students’ personally identifiable information. All printouts must be securely stored and then destroyed when no longer needed.

1. In the banner, click **Print Session**. The computer’s print dialog window appears.

2. Click **OK**.

**Print Approved Requests Information**

You can view and print a list of every print request you approved for students during the current session.
1. In the banner, click **Approved Requests**. The **Print Requests** window appears listing all the approved print requests.

2. Select **Print** to print the list.

### Secure Browser

The Secure Browser ensures test security by prohibiting access to external applications and navigation away from the test. When the Secure Browser launches, it checks for other applications running on the device. If it detects a forbidden application, it displays a message listing the offending application and prevents the student from testing. This also occurs if a forbidden application launches while the student is already in a test.

In most cases, a detected forbidden application is a scheduled or background job, such as anti-virus scans or software updates. The best way to prevent forbidden applications from running during a test is to schedule such jobs outside of planned testing hours.

Some additional measures you can implement to ensure the test environment is secure are:

- **Close External User Applications**
  
  Before launching the Secure Browser, or prior to administering the online tests, close all non-required applications on testing devices, such as word processors and web browsers.

- **Avoid Testing with Dual Monitors**
  
  Students should not take online tests on computers connected to more than one monitor. Systems that use a dual monitor setup typically display an application on one screen while another application is accessible on the other screen.

- **Disable Screen Savers and Timeout Features**
  
  On all testing devices, be sure to disable any features that display a screen saver or log users out after a period of inactivity. If such features activate while a student is testing, the Secure Browser logs the student out of the test.

### Using the Secure Browser with Accessibility Software

For students with special needs or administrators seeking to accommodate students using accessibility features, the Secure Browser provides the option for assessments to be taken in less restrictive environments. This feature is known as Permissive Mode.

**Policy:** Requests to use permissive mode for operational testing must be submitted **at least 72 hours** in advance of testing. Districts may submit student-specific requests by contacting the Ohio Help Desk. All requests will be reviewed by the Ohio Department of Education. Note: Permissive mode is on by default for students taking an AASCD test, there is no need to call the Ohio Help Desk in this instance.
Permissive Mode is an accommodation option that allows students to use accessibility software in addition to the Secure Browser. Offered on MacOS and Windows, students testing in Permissive Mode can have moderated access to the system outside of the Secure Browser. This allows students who need accessibility tools to seamlessly navigate between the Secure Browser and approved applications that suit their test taking needs.

Please note that forbidden applications will still not be allowed to run. For information about supported operating systems, see the Quick Guide for Setting Up Your Online Testing Technology. For additional information about permissive mode and assistive technology, see the Assistive Technology Manual.

Permissive Mode activates when the student is approved for testing. Students who have the Permissive Mode setting enabled should not continue with the sign-in process until their accessibility software is correctly configured.

To use accessibility software with the Secure Browser:

1. Open the required accessibility software.

2. Open the Secure Browser. Begin the normal sign-in process up to the TA approval step.

3. When a student is approved for testing, the Secure Browser allows the operating system’s menu and task bar to appear.
   - **Windows**: On Windows, the Secure Browser resizes, and the taskbar remains visible inside the test in its usual position. Students can execute the keyboard shortcut ALT+TAB to switch between the Secure Browser and accessibility applications, such as JAWS and NVDA, that they are permitted to use in their test session. Please note that when using Windows 8 and above, the task bar remains on-screen throughout the test after enabling accessibility software. However, forbidden applications are still prohibited.
   - **Mac**: On MacOS, the Secure Browser resizes, and students can view the dock in its usual position inside the test. If the dock is set to autohide, no resizing occurs, and the dock is only visible when the mouse is moved toward the bottom of screen. Students can execute the keyboard shortcut CMD+TAB to switch between the Secure Browser and permitted accessibility applications.

4. The student must immediately switch to the accessibility software that is already open on the computer so that it appears over the Secure Browser. The student cannot click within the Secure Browser until the accessibility software is configured.
   - **Windows**: To switch to the accessibility software application, click the application in the task bar.
   - **Mac**: To switch to the accessibility software application, click the application in the dock.

5. The student configures the accessibility software settings as needed.
6. After configuring the accessibility software settings, the student returns to the Secure Browser. At this point, the student can no longer switch back to the accessibility software. If changes need to be made, the student must sign out and then sign in again.

7. The student continues with the sign-in process.

As soon as Permissive Mode is turned off, the Secure Browser reoccupies the whole screen so that the taskbar or dock is no longer visible, and the student’s ability to switch between any applications and Secure Browser is suppressed.

**Accessing the Secure Browser on Mobile Devices**

Tablets and Chromebooks should be configured for testing before you provide them to students. For more information, see the *Quick Guide for Setting Up Your Online Testing Technology* on the Ohio Assessment Portal.

*To configure iOS devices:*

- Tap the **AIRSecureTest** Secure Browser icon.

*To configure Android tablets:*

1. Tap the **AIRSecureTest** Secure Browser icon.

2. If the Secure Browser keyboard is not selected, follow the prompts on the screen. When the Secure Browser keyboard is selected, the Secure Browser app opens.

*To configure Chromebooks:*

- From the **Apps** link on the Chrome OS login screen, select **AIRSecureTest** Secure Browser.

**Closing the Student Testing Site on Tablets**

After a test session ends, close the AirSecureTest application on student tablets.

*To close the Student Testing Site on iOS devices:*

1. Double-tap the Home button. The multitasking bar appears.

2. Locate the AIRSecureTest app preview and slide it upward.

*To close the Student Testing Site on Android tablets:*

1. Tap the Menu icon in the upper-right corner.

2. Tap Exit. A confirmation message appears.

3. Tap Exit.
To close the Student Testing Site on Chromebooks:

- Click **Close Secure Browser** in the upper-right corner.

**Force-Quitting the Secure Browser**

In the rare event that the Secure Browser or test becomes unresponsive, you can force-quit the Secure Browser. Please note that the Secure Browser hides features such as the Windows task bar or Mac OS X dock. If the Secure Browser is not closed correctly, then the task bar or dock may not reappear correctly, requiring you to reboot the device. Avoid using a force-quit command if possible.

To force the Secure Browser to close, use the keyboard command for your operating system as shown below. This action logs the student out of the test. When the Secure Browser is opened again, the student logs back in to resume testing.

<table>
<thead>
<tr>
<th>Operating System</th>
<th>Key Combination</th>
</tr>
</thead>
<tbody>
<tr>
<td>Windows*</td>
<td>Ctrl + Alt + Shift + F10</td>
</tr>
<tr>
<td>Mac OS X*</td>
<td>Ctrl + Alt + Shift + F10. The Ctrl key may appear as Control, Ctrl, or ^</td>
</tr>
<tr>
<td>Linux</td>
<td>Ctrl + Alt + Shift + Esc</td>
</tr>
</tbody>
</table>

* If you are using an Apple keyboard, you may need to press Ctrl + Shift + Option + F10. If you are using a laptop or notebook, you may also need to press Function before pressing F10.

Force-quit commands do not exist for the Secure Browser for iOS, Chrome OS, and Android devices.

**iOS:** Double-tap the Home button, then close the app as you would any other iOS app.

**Chrome OS:** To exit the Secure Browser from the sign-in screens, press Ctrl + Shift + S. You cannot force quit once the test begins.

**Android:** To close the Secure Browser, tap the menu button in the upper-right corner and select **Exit**.
Student Lookup Feature

You can use the student lookup feature in the TA Site to perform a quick or advanced search for student information. This is useful if students signing in to your test session cannot remember their login information.

1. To perform a quick search:
   a. In the banner, select **Student Lookup**.
   b. Enter a student’s full SSID and click **Submit SSID**. Search results appear below the search field.

2. To perform an advanced search:
   a. In the banner, select **Student Lookup**, and then select **Advanced Search**.
   b. Select the appropriate district and school from the drop-down lists.
   c. Select the appropriate grade.
   d. *Optional:* Enter a student’s exact first or last name. Partial names are not allowed.
   e. Click **Search**. Search results appear below the search fields.
   f. To view a student’s information, click on the Details column.

Figure 51. Student Lookup: Quick Search

Figure 52. Student Lookup: Advanced Search

Text Response Questions

For some text-response item types in the Student Testing Site, students can use a formatting toolbar. This toolbar is available above the response field for some text response questions (see Figure 53) and also appears whenever students right-click anywhere in the text area. The formatting toolbar allows students to apply styling to text and use standard word-processing features. The lower-right corner of the response field displays the word count and character count for the student’s response. Table 10 provides an overview of the formatting tools available.
Figure 53. Text Response Question with Formatting Toolbar

The student uses this field to respond to the writing prompt.

Spell Check Feature

The spell check tool identifies words in the response field that may be misspelled.

1. In the toolbar, select the spell check tool. Potentially incorrect words change color and become underlined.

2. Select a misspelled word. A list of suggestions appears.

3. Select a replacement word from the list. If none of the replacement words are correct, close the list by clicking anywhere outside it.

4. To exit spell check, select the spell check tool again.

Special Characters Feature

Students can add mathematical, accented, and other symbols.

1. To add a special character, select the special character button.

2. In the window that pops up, select the required character.

Transfer a Test Session

You can transfer an active test session from one device or browser to another without stopping the session or interrupting in-progress tests. This is useful in scenarios when your computer malfunctions or if you accidentally close the browser while a session is in progress. Please note that to transfer a test session, you must enter the active Session ID.

Your session remains open until it times out due to inactivity. If you do not return to the active session within 20 minutes and there is no student activity during that time, the Test Delivery System logs you out and pauses the students’ tests.

The Test Delivery System ensures that you can only administer a test session from one browser at a time. If you move a test session to a new device, you cannot simultaneously administer the session from the original browser or device.
1. While the session is still active on the original device or browser, log in to the TA Site on the new device or browser. A Session ID prompt appears.

2. Enter the active Session ID in the text box and click **Enter**. The TA Site appears, allowing you to continue monitoring your students’ progress. The test session on the previous computer or browser automatically closes.

Please note that the Session ID prompt appears any time you access the TA Site during an active session. If you do not wish to return to the active session, you can click **Start a Different Session** to create a new session or **Logout** to close the active session and log out of the TA Site.

**User Support and Troubleshooting Information**

**User Support**

For information and assistance in using the Test Delivery System, contact the Ohio Help Desk. The Help Desk is open Monday–Friday 7:00 a.m. to 5:00 p.m. (except holidays or as otherwise indicated on the Ohio Assessment portal).

**Ohio Help Desk**

Toll-Free Phone Support: 877-231-7809

Email Support: OHHelpdesk@air.org

Please provide the Help Desk with a detailed description of your problem, as well as the following:

- Test Administrator name
- If the issue pertains to a student, provide the student’s SSID and associated district or school. Do not provide the student’s name.
- If the issue pertains to a TIDE user, provide the user’s full name and email address.
- Any error messages and codes that appeared, if applicable.
Users and Password Issues

Your username for logging in to the TA Site is the email address associated with your account in TIDE. When you are added to TIDE, you receive an activation email containing a temporary link to the Reset Your Password page. To activate your account, you must set up your password within 15 minutes of the email being sent.

- If your first temporary link expired
  In the activation email you received, click the second link provided and proceed to request a new temporary link.

- If you forgot your password:
  On the Login page, click Forgot Your Password? and then enter your email address in the Email Address field. You will receive an email with a new temporary link to reset your password.

- If you did not receive an email containing a temporary link or authentication code:
  Check your spam folder to make sure your email program did not categorize it as junk mail. If you still do not have an email, contact your test coordinator to make sure you are listed in TIDE.

- Additional help:
  If you are unable to log in, contact the Ohio Help Desk for assistance. You must provide your name and email address. Contact information is available in the User Support section of this user guide.

Common Student Sign-in Errors

The Test Delivery System generates an error message if a student cannot sign in. The following are the most common student sign-in issues:

- Session does not exist:
  The student entered the Session ID incorrectly or signed in to the wrong site. Verify that the student correctly entered the active Session ID. Also, verify that both you and the student are using the correct sites. For example, students signed in to the Student Practice Site cannot access sessions created in the TA Interface. A message displayed in the bottom-left corner of the Student Sign-In page indicates which site the student is on. If a student is on the wrong site, the student can select the button included in the message to proceed to the correct site.
Appendix

• **Student information is not entered correctly:**
  Verify that the student correctly entered the SSID. If this does not resolve the error, use the Student Lookup tool to verify the student’s information.

• **Session has expired:**
  The Session ID corresponds to a closed session. Ensure that the student enters the correct Session ID and verify that your session is open. For more information about test sessions, see the section Selecting Tests and Starting a Test Session.

• **Student is not associated with the school:**
  The student is not associated with your school, or you are not associated with the student’s school.

Resolving Secure Browser Error Messages

This section provides possible resolutions for the following messages that students may receive when signing in to tests using the Secure Browser.

• **You cannot login with this browser:**
  This message occurs when the student is not using the correct Secure Browser. To resolve this issue, ensure the latest version of the Secure Browser is installed, and that the student launched the Secure Browser instead of a standard web browser. If the latest version of the Secure Browser is already running, then log the student out, restart the device, and try again.

• **Looking for an internet connection...:**
  This message appears when the Secure Browser cannot connect with the Test Delivery System. This can occur if there is a network-related problem. Make sure that either the network cable is plugged in (for wired connections) or the Wi-Fi connection is live (for wireless connections). Also check if the Secure Browser must use specific proxy settings; if so, those settings must be specified as options when configuring the Secure Browser. If connection issues persist, contact a network technician.

• **Test Environment Is Not Secure:**
  This message can occur when the Secure Browser detects a forbidden application running on the device. If this message appears on an iPad, ensure that either Autonomous Single App Mode or Automatic Assessment Configuration is enabled.
